## MORE PEOPLE ARM THEMSELVES WITH BULWARK® THAN ANY OTHER FR BRAND.

//////

We are Bulwark. The world's leading flame-resistant (FR) apparel brand. And the relentless protectors of the people who power the world. From outfitting you with the finest, most advanced, most intuitively designed FR products ever made, to surrounding you with the industry's premier FR education programs and consultative services with 50 years of frontline experience, we are your total FR solution. So when you see our triangle on your left, trust you've done everything right. Because with Bulwark, you are armed - literally, and figuratively - with the world's best.

# FABRIC GUIDE

Use our fabric guide to help you select the optimal Bulwark® fabric for any situation. Our comprehensive range of industry-leading options guarantees a perfect fit for a wide variety of industrial applications.

## iQ SERIES®

iQ Series® products shift our collective mindset from the garment to the wearer and are designed to solve real-world problems. From the yarn blending to the fabric finishing, this product is created by a team of professionals with a hands-on approach. iQ products are created from blends of high performance fibers incorporated into superior fabrics. They are available in a variety of weights and are designed to achieve multiple industry standards.

### **EXCEL FR®** 100% COTTON. 100% COMFORT. 100% FLAME-RESISTANT.

EXCEL FR® cotton garments offer unbeatable protection for foundries, flame cutting and welding, as well as electrical utilities and the chemical, oil, gas and petrochemical industries. All EXCEL FR® cotton apparel is permanently treated to guarantee flame resistance for the life of the garment.

### **EXCEL FR® COMFORTOUCH®** COTTON'S COMFORT. NYLON'S DURABILITY.

This practical 88% Cotton/12% Nylon blend provides long-lasting protection for nearly all work environments. Ideal applications include ferrous metals, electrical utilities and the chemical, oil, gas and petrochemical industries. Every EXCEL FR® ComforTouch® garment is engineered to provide flame resistance for the life of the garment.

### **NOMEX® ESSENTIAL** LIGHTWEIGHT. BREATHABLE. INHERENTLY FLAME-RESISTANT.

DuPont Nomex® Essential (93% Nomex® Aramid/5% Kevlar® Aramid/2% Anti-Static Fiber) garments are extremely durable. Nomex® Essential apparel is preferred by workers in petrochemical and refinery environments and makes a great choice for electric and gas utility workers.

### **COOLTOUCH® 2** DURABLE. WICKABLE. BLENDED INHERENT.

CoolTouch® 2 garments provide flame-resistant protection in a lightweight blended fabric (48% Modacrylic/37% Lyocell/15% Para-Aramid and 45% Modacrylic/35% Lyocell/15% Polyamide/5% Para-Aramid). The result – unbeatable softness coupled with lasting durability and available in CAT1 and CAT2 protection.

### **HI-VISIBILITY FR** FLAME-RESISTANT. COMFORTABLE. COMPLIANT.

Bulwark® offers garments designed to provide additional wearer safety during periods of limited visibility or in the often complex and varying backgrounds found in many occupations such as traffic control, construction and utility work along roadways and equipment operation.

### **HI-VISIBILITY RAINWEAR** BE SAFE. BE DRY. BE SEEN.

Flame-resistant rainwear from Bulwark® provides an effective barrier against rain and wind. Extra confidence comes from knowing these garments will not melt, drip or burn when exposed to an electrical arc or flash fire.

### **MOLTEN METAL® PROTECTION** SHED MOLTEN ALUMINUM. CAST OFF CRYOLITE.

Because of its unique ability to shed molten aluminum as well as cryolite, specialized Molten Metal protective garments are used extensively throughout the aluminum casting industry. Our products are inherently flame-resistant, so their ability to protect will never be compromised by laundering.

### **FR DISPOSABLES** PROTECT OTHER GARMENTS. PREVENT CONTAMINANT SOILING.

Sontara® Extend FR garments are water-repellent and made to withstand minor splashes without saturation to garments underneath. Use them to extend the life of more expensive thermal protective garments.

### **ELECTRICAL SWITCHING CLOTHING** PROTECTION FOR MAXIMUM EXPOSURE.

For employees installing, maintaining or repairing high-voltage electrical systems, Bulwark's 40 cal/cm<sup>2</sup> electrical switching coat, bib and hood with face shield provide protection from extreme electrical arc risks.

# ICON LEGEND

Throughout the catalog, you will notice different icons next to the product descriptions for our garments. The icons help you quickly determine new products, CAT protection, NFPA® 2112 Compliance and ISO/EN certification.

NEW

## NEW PRODUCT FOR 2022

ARC RATINGS

Short sleeved FR shirts are not intended to be worn as single layer protection because they do not fully cover potentially exposed areas as completely as possible.

1  
CAT

## CATEGORY 1 PROTECTION

Arc-rated FR long-sleeve shirt and FR pants or FR coverall with a required minimum Arc Rating of 4 cal/cm<sup>2</sup>.

2  
CAT

## CATEGORY 2 PROTECTION

Arc-rated FR long-sleeve shirt and FR pants or FR coverall with a required minimum Arc Rating of 8 cal/cm<sup>2</sup>.

3  
CAT

## CATEGORY 3 PROTECTION

Arc-rated FR long-sleeve shirt and FR pants or FR coverall, arc flash suit, balaclavas etc. selected so that the system arc rating meets a required minimum Arc Rating of 25 cal/cm<sup>2</sup>.

4  
CAT

## CATEGORY 4 PROTECTION

Arc-rated FR long-sleeve shirt and pants or FR coverall, and arc flash suit selected so that the system arc rating meets a required minimum Arc Rating of 40 cal/cm<sup>2</sup>. CAT4 outerwear is not equivalent to 40 cal switching gear/flash suit and does not offer equivalent protection to workers engaged in switching and/or similar activities.

## CP 100 PROTECTION

Garments that provide repellency for a low level of liquid chemical splash protection. They repel many but not all acids, corrosives, oxidizers and polar organic solvents<sup>1</sup>, that typically have medium to high surface tension and medium to high polarity. Their application is only for inadvertent liquid chemical-splash of small volumes at atmospheric pressure. Garments that provide repellency for a low level of liquid chemical splash protection.

## NFPA® 2112 COMPLIANT

Bulwark® Protective Apparel offers flame-resistant protective garments that are certified by UL to meet the requirements of NFPA® 2112 Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposure from Fire, 2018 Edition. NFPA® 2113 Standard on Selection, Care, Use, and Maintenance of Flame-Resistant Garments for Protection of Industrial Personnel Against Short-Duration Thermal Exposure from Fire, 2020 Edition, requires that garments cover the upper and lower body and flammable underlayers as completely as possible. Bulwark® garments meet this requirement either as a single garment such as a coverall or when worn with another certified garment such as a shirt or pants to provide both upper and lower body coverage.

This **BULWARK® FR** collection has been designed according to EU Regulation 2016/425 and specifically to the European Standards ISO 13688:2013 (General Requirements for protective clothing), EN ISO 11612:2015 (Protective Clothing for Industrial workers exposed to heat and flame), EN 1149-5:2008 (Protective clothing - Electrostatic properties) and IEC 61482-2:2009 (Protective Clothing against the thermal hazards of an electric arc) to the referenced performance levels. ECType examination by a Notified Body has proven that the clothing meets the fundamental requirements as described in the European Directive EU Regulation 2016/425. The CE mark is the visible sign of our compliant PPE.

WASH CODES

Do not use bleach, hydrogen peroxide, starch or fabric softeners on any Bulwark garment. Please visit [bulwark.com](http://bulwark.com) for complete laundry instructions.

IL-HS

**INDUSTRIAL LAUNDRY - HEAVY SOIL:** This method of laundering is commonly used to remove heavy soil with a combination of higher water temperature (160° F max) and harsher chemistry. pH should be held to 11.5 max. More aggressive wash formulas may be necessary to remove heavy soils but may result in accelerated color loss, deterioration in performance of retroreflective trim and overall reduced garment service life.

IL-LS

**INDUSTRIAL LAUNDRY - LIGHT SOIL:** This less aggressive (industrial) laundering process is commonly used on uniforms which are lightly soiled or made of fabrics that are not designed to withstand higher wash temperatures or harsher chemistry. In a typical light soil formula, water temperatures are usually held to a maximum of 140° F and pH to 10.5 max.

HW

**HOME WASH:** A laundering process normally defined as washing in a residential type top- or front-loading unit followed by tumble drying. Detergents used in this process are formulated for home use and are readily available on the consumer market.

<sup>1</sup>See [bulwark.com/bulwark-cp](http://bulwark.com/bulwark-cp) for more information including a technical brief with a list of chemicals that have been tested.

SINCE '71

## iQ SERIES<sup>®</sup>

The industry's ongoing call for smarter FR deserves a revolutionary response. The Bulwark<sup>®</sup> iQ Series<sup>®</sup>. Every iQ garment is the product of a new way of thinking: Design to solve real world FR problems uncovered from first-hand, real-wear insights. Then employ the latest scientific advancements and fabric technologies to bring those designs to life. The future of FR is here. And it's brighter than ever before.

**ARM YOURSELF**

# iQ SERIES<sup>®</sup> COMFORT COLLECTION

Let's be honest, "comfort" isn't exactly the first word that comes to mind when most people in the safety industry think of FR. The iQ Series<sup>®</sup> Comfort Collection set out to change that, by combining revolutionary design features with lightweight and breathable fabrics, to make this collection the most comfortable FR on the market. Because the job isn't always comfortable, but that doesn't mean your FR workwear can't be.

**VIEW THE COLLECTION: [BULWARK.COM](http://BULWARK.COM)**

# iQ SERIES® LIGHTWEIGHT COMFORT WOVEN SHIRT

QS24RB

## iQ SERIES<sup>®</sup> WOMEN'S COMFORT KNIT POLO WITH 4-BUTTON PLACKET

NFPA<sup>®</sup> 2112 Compliant

Revolutionary FR workwear designed for women. The QT15 polo is designed for fit and comfort, with FR compliance, of course. The 4-button placket allows you to button all the way up for maximum safety, or unbutton when you're out of the line of fire. Shirring at the back of this shirt, with a two-ply yoke creates a feminine silhouette, and the concealed rib knit cuffs stay in place all day long.

**QT15** - Women's (Reg) XS-2XL.  
Fit Chart LFC-02.

**Fabric:** Exclusively with Westex G2™ fabrics by Milliken®. Flame-resistant, 5.3 oz. (180 g/m<sup>2</sup>) 69% Cotton / 25% Polyester / 6% Polyoxadiazole

**Protection:** Arc Rating ATPV 8.2 calories/cm<sup>2</sup>

# iQ SERIES<sup>®</sup> ENDURANCE COLLECTION

FR workwear won't pass muster if it doesn't last. The iQ Series<sup>®</sup> Endurance Collection is a line of durable FR without the tradeoffs and compromises traditionally associated with durability. iQ's revolutionary dual elemental protection penetrates FR chemistry deep into the fiber of the fabric without adding weight, while the addition of polyester improves strength and overall durability, so you can be confident your FR protection will last every bit as long as you do.

**HI-VIS ICON LEGEND**

Intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 2 garments require the use of greater amounts of hi-visibility materials than Class 1 apparel, which help distinguish between a human and an inanimate object.

Intended for use by personnel exposed to vehicular traffic from public access rights of way or roadway temporary traffic control zones. Class 3 garments mandate the greatest amount of hi-visibility material for workers in moving, complex backgrounds, including reflective striping on sleeves and pant legs (if present).

Pants, bib overalls, shorts and gaiters meeting minimum area requirements for background material and retroreflective trim. Class E apparel, however, cannot be worn alone to provide adequate visibility of workers. When Class E items are worn with Performance Class 2 or Class 3 apparel, the overall classification of the ensemble is Performance Class 3.

CMDCHG

## FLAME RESISTANT (FR) / CHEMICAL-SPLASH PROTECTION (CP)

These FR/CP garments bring together the latest innovations in chemical protection safety to protect wearers against multiple hazards. Flame resistant fabric prevents clothing ignition during short-duration thermal exposures. FR/CP garments also repel small amounts of liquid chemicals that are either dropped or splashed on the fabric, resisting penetration and wicking of an inadvertent, secondary liquid chemical-splash. They are also lightweight, breathable and comfortable to wear.

### MEN'S FLAME RESISTANT (FR) / CHEMICAL-SPLASH PROTECTION (CP) PREMIUM COVERALL

NFPA® 2112 Compliant

Black stand up collar with concealed snap at neck. Action back. Two-way, concealed, Nomex® tape, brass, break-away zipper. Elastic waist. Snapped wrist closure. Pockets include: splash resistant side pass-through with snap closure, Two front inset pockets, Two rear patch pockets, Two double stitched chest pockets with snap flaps.

## FLAME RESISTANT (FR)/ CHEMICAL-SPLASH PROTECTION (CP)

These FR/CP garments bring together the latest innovations in chemical protection safety to protect wearers against multiple hazards. Flame resistant fabric prevents clothing ignition during short-duration thermal incidents and emergency exposure to flame. FR/CP garments also repel small amounts of liquid chemicals that are either dropped or splashed on the fabric, resisting penetration and wicking of an inadvertent, secondary liquid chemical-splash. They are also lightweight, breathable and comfortable to wear.

### MEN'S & WOMEN'S FLAME RESISTANT (FR) / CHEMICAL-SPLASH PROTECTION (CP) LAB COATS

NFPA® 2112 Compliant

Concealed snap-front closure. Black lay flat collar for easy recognition as a CP lab coat. FR-only knit cuffs – safer than typical open cuff. Splash-resistant pass-throughs for easy inner pocket access. Pockets include one two-needle top-stitched chest pocket with pencil stall and two two-needle top-stitched lower pockets with flaps. KNR3 features tailored fit specifically for women.

**KNR2** - Men's (Reg) S-4XL. Fit Chart MFC-12.

**KNR3** - Women's (Reg) XS-2XL. Fit Chart LFC-01.

**Fabric:** Flame-resistant, 4.5 oz. (150 g/m<sup>2</sup>) Nomex® Essential (93% Nomex® Aramid / 5% Kevlar® Aramid / 2% Other Fiber) with Westex® ShieldCXP™

**Protection:** Short-duration thermal hazards and inadvertent liquid chemical splashes. Arc Rating ATPV 5.6 calories/cm<sup>2</sup>.

## HIGH / ENHANCED VISIBILITY RETRO-REFLECTIVE TRIM

Increased worker visibility can be critical when working in high-traffic areas, around equipment operations or within environments where it is crucial to be seen. Adding striping to your uniform can make a life-saving difference. The American National Standard for High-Visibility Safety Apparel is ANSI/ISEA 107. This standard specifies performance requirements including the type, location and minimum area of the retro-reflective trim, as well as the color, physical properties and minimum area of the fabric used in the construction of high-visibility garment. These performance requirements have been developed by industry experts to provide visibility of wearers in a variety of situations. We recommend following these requirements whenever possible, based on your hazard assessment. ANSI-ISEA 107 compliant garments can be found on pages 42-51.

Simply enhancing your uniform by adding retroreflective striping can also be helpful in providing improved visibility of workers. Select from many trim options, colors and placement to meet your specific worker visibility needs. This distinctive striping can be added to most Bulwark® garments. Flame-resistant striping is always used, for FR garments. The garments and striping you select should depend on the end use requirements and the method of laundering used on the garments.

Above are examples of how a plain stocked garment can be customized with three of our most popular striping configurations. With a few exceptions, stripes shown above the waist can be applied to a shirt, jacket or coverall. Stripes shown below the waist can be applied to a pant or coverall. The specific details of a garment, like the size of a pocket, the placement of closures, an emblem or an additional pocket, may dictate a slight change in the placement from what is shown in these images. Striping applied post-manufacturing will always go around a pocket or emblem. Pockets cannot be removed for reflective trim application. Stripes on a waistband will be moved up or down if the waistband has elastic sections.

Through our Imagine It<sup>®</sup> program, we have taken the capability of creating customized uniform items and apparel to a new level. Visualize it... create it... and we'll produce it. This unique program allows you to select stock apparel and modify or customize them to create uniforms that cater directly to your customer's needs. This allows many customers to purchase similar items while maintaining individual expression.

SLW2LB

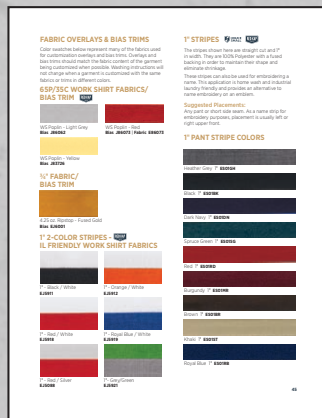

## EMBROIDERY & EMBLEMS

Customize your Bulwark<sup>®</sup> garments by adding a company logo or employee name and department with direct embroidery or emblems.

Thread colors are from A & E Signature threads. They have excellent color retention with a high luster finish, are strong to prevent breakage, and have very good abrasion resistance that will stand up to the rigors of industrial washing. To preserve the flame-resistant qualities of the apparel, minimize the size and number of non-FR emblems applied to a garment.

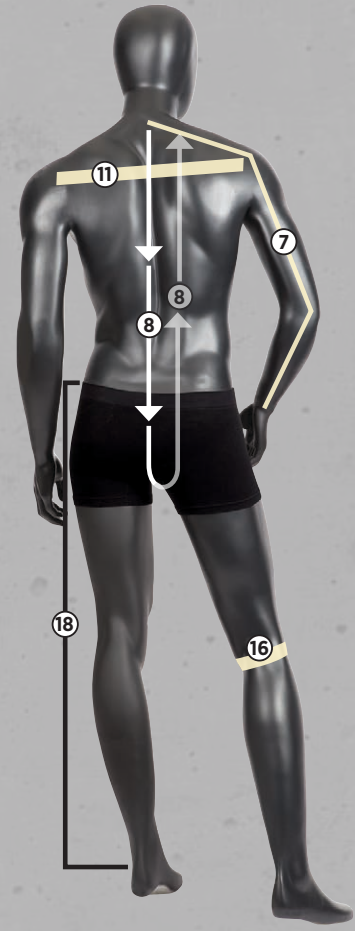

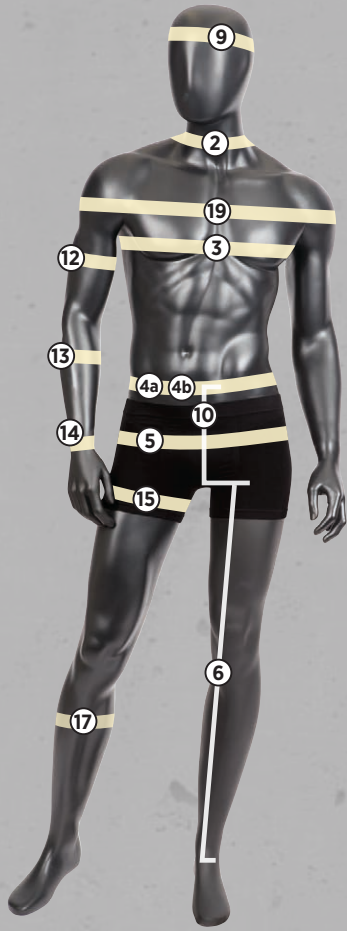

## TOOLS TO GET YOU STARTED: IMAGINE IT ONLINE CATALOG

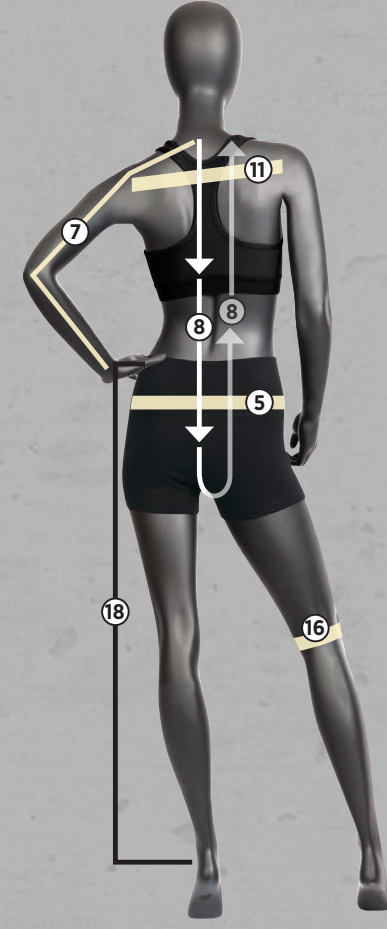

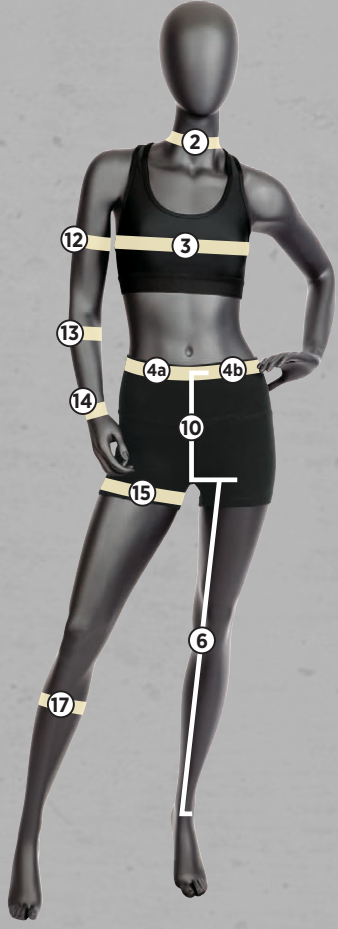

You can find our online customization catalog at [wpg.wwof.com/Information/ImagineIt](http://wpg.wwof.com/Information/ImagineIt). The catalog shows you a quick glance of over 100 embroidery thread color options. There is also a section outlining placement of reflective trim along with the different color options and sizes available.

MEN'S MEASUREMENT ZONES

WOMEN'S MEASUREMENT ZONES

**HEIGHT**

- 1** Stand straight against a wall without your shoes. Make a mark level with the top of your head. Measure from this point down to the floor.

**NECK**

- 2** Measure around the base of the neck where a collared shirt would fit, or measure a collar band on a shirt that fits you well.

**CHEST / BUST**

- 3** Measure the fullest part of your chest/bust. Hold the tape firmly, but not tightly. Be sure the tape is level and straight across your back. Stand naturally.

**WAIST / MID-SECTION**

- 4a** First, remove your belt. Then, measure over shirt (not over pants) at ½" to 1" below the navel. Hold the tape firmly but not tightly. If pants are worn under a protruding abdomen, measure where pants are typically worn. **Note:** For women, please refer to the hip measurement as the key point of measure for fitting pants.

**WAIST / MID-SECTION**

- 4b** For shirts and covering garments such as coveralls - measure midsection over clothing around the fullest part of the abdomen. **Note:** Include both "A" and "B" measurements if ordering multiple garments.

**HIPS**

- 5** Stand with your heels together. Measure around the fullest part of the hips. Hold the tape measure straight and level.

**INSEAM**

- 6** Standing straight, measure the distance from the crotch to just below the ankle bone. OR - using similar style pants that fit you well: lay garment flat with front and back creases and smooth. Measure along the inside seam of one leg from the bottom of the hem to the crotch.

**SLEEVE**

- 7** Bend the elbow slightly. Start at the center back of the neck and measure across the shoulder to the elbow and down to the wrist bone.

**TRUNK**

- 8** Measure from base of neck (front) down around crotch and back up to the bottom of the collar. (For coveralls only)

**CAP / HAT SIZE**

- 9** Measure the circumference of the head at it's widest diameter, approximately ½" above the ears.

**FRONT & BACK RISES**

- 10** **FRONT** - This is the distance from the center front at the top of the waistband to the intersection of the crotch seams.  
**BACK** - This is the distance from the center back at the top of the waistband to the intersection of the crotch seams.

**ACROSS SHOULDER**

- 11** While standing with arms down, measure across the back from one shoulder joint to the other.

**UPPER ARM / BICEP**

- 12** Measure the maximum circumference of the upper arm just below the under arm.

**FOREARM**

- 13** Measure the maximum circumference of the forearm at approximately 6" above the wrist.

**WRIST**

- 14** Measure the wrist circumference over the wrist bone.

**THIGH**

- 15** Measure around thigh (parallel to floor), below crotch.

**KNEE**

- 16** With the leg straight, measure the knee circumference over the knee cap and parallel to the floor.

**CALF**

- 17** Measure the circumference of the largest part of the lower leg approximately half way between the knee and ankle and parallel to the floor.

**OUTSEAM**

- 18** Measure along the outside of the leg from the top of the waistband to the bottom of the hem of just below the ankle bone. OR - lay garment flat, measure along outseam from top of band to bottom of hem.

**OVERARM**

- 19** With arms at the sides, measure around the broadest part of the shoulders and upper arms, keeping the tape level at all times. If overarm measurement is more than 7" larger than chest measurement, go up one size.

**POLICY STANDARD TERMS & CONDITIONS OF SALE**

Please refer to our website at [www.bulwark.com](http://www.bulwark.com) for Standard Terms and Conditions of Sale, or call:

USA: 1-800-223-3372  
 Canada: 1-800-667-0700  
 Distributors: 1-800-733-5271

**INVENTORY & CATALOG UPDATES**

Not all sizes for a particular garment identified in this catalog are maintained in inventory. Upon receipt of your order, you will be provided an estimated shipping date.

**PRODUCT RETURNS**

For latest information, visit our website at [www.bulwark.com](http://www.bulwark.com). Prior authorization for returns may be obtained by calling Customer Care: USA: 1-800-223-3372 and Canada: 1-800-667-0700. For Distributors, call 1-800-733-5271.

**PAYMENT TERMS**

Refer to Standard Terms and Conditions of Sale.

**CUSTOMIZATION**

Bulwark® offers several options for customizing your garments from stock. See your Bulwark® Product Guide or inquire for details on pricing.

**HEMMING**

Refer to your Bulwark® Product Guide. For latest information visit our website at [www.bulwark.com](http://www.bulwark.com).

**GARMENT CARE**

Refer to the care label in your Bulwark® apparel. For latest information, visit our website at [www.bulwark.com](http://www.bulwark.com).

**PRODUCT SPECIFICATIONS**

All trademark and logos shown in this catalog are for the product illustration only and are not available to a customer, nor are they an endorsement by or for any person or other entity. At time of order, please provide the appropriate proof of authorization for your use of trademark's copyrights, patents and other intellectual property.

Bulwark garments are not intended for fire entry, structural or wildlands fire fighting activities and, unless otherwise indicated, provide no protection from chemical exposures. They should be removed at once if fouled with flammable material. To prevent generation of potentially hazardous static electricity, do not don or remove any garments in a hazardous area.

Bulwark® garments are not intended for personal, family or household use as defined in the Manguson-Moss Warranty Act, 15 U.S.C. 2301-2312. For latest information, visit our website at [www.bulwark.com](http://www.bulwark.com).

**ARC RATINGS**

Arc ratings published in this catalog are supplied to us by our fabric suppliers or are the result of our own arc testing. An arc rating can be reported in cal/cm<sup>2</sup> as either ATPV or E<sub>BT</sub> and is the incident energy at which there is 50% probability of occurrence of a second degree burn or of fabric breakopen, respectively. As with all tests, some level of variation in test results is normal and expected among fabrics of identical fiber content and nominal weight. In order to assist end users with their hazard analysis by providing the most conservative arc rating, Bulwark® will publish the lowest arc rating for that fabric weight in our catalog and on our garment label.

---

Bulwark® garments are designed for continuous wear. They meet applicable standards such as NFPA® 2112, Standard on Flame-Resistant Clothing for Protection of Industrial Personnel Against Short-Duration Thermal Exposures from Fire, ASTM F2302, Standard Performance Specification for Labeling Protective Clothing as Heat and Flame Resistant National Fire Protection Association (NFPA®) Standard 70E, Standard for Electrical Safety in the Workplace, ASTM Standard F1506, Flame-Resistant Materials for Wearing Apparel for Use by Electrical Workers Exposed to Momentary Electric Arc and Related Thermal Hazards. Refer to individual garment labels to confirm compliance with specific performance standards. Because these fabrics are flame-resistant, they are acceptable under the Occupational Safety & Health Administration (OSHA) Final Rule 1910.269. Final Rule on Electrical Protective Equipment. For complete information on these products, as well as laundering instructions, please visit [bulwark.com](http://bulwark.com).
